

See a Doctor on Your Time

Virtual Medicine Helps You Feel Better Faster

At 3 a.m., you wake up with a fever and a rash. Rather than waiting until morning, you can connect with a doctor right away through virtual medicine. The doctor diagnoses your condition and sends a prescription directly to your pharmacy. **It's a convenient way to get needed non-emergency care at odd hours, when traveling or when your primary care provider is not available.**

◀ A video visit with a doctor using your computer, tablet or smartphone

YOU HAVE 24/7 ACCESS

With virtual medicine, you and your family have access — day or night, seven days a week — to U.S. licensed, board-certified doctors. These doctors diagnose and treat most non-emergency illnesses. They can even prescribe medications when appropriate.

WHEN TO USE VIRTUAL MEDICINE

Virtual doctors can treat sinus infection, upper respiratory infection, bronchitis, flu, conjunctivitis, cough and sore throat. Eighteen of the top 20 reasons people visit urgent care centers can be treated through a virtual medicine visit.

"I was seen immediately, got some eye drops and was on my way!"

REGISTER AND DOWNLOAD APP TO GET STARTED

Visit amwell.com or doctorondemand.com and follow the instructions to register and download their mobile apps. You can use either or both of these services, depending on the availability of virtual doctors in your area.
